| collaboration | | |
| use of energy (incl. cooling) | } | DIRECT |
| transports | | |

O1: The competence of faculty, staff and students regarding sustainable development shall *increase*.

- T 1.1 x % of faculty and staff shall participate in education about sustainable development
- T 1.2 x % of faculty and staff shall receive additional education about sustainable development.
- T 1.3 100 % of the responsible staff shall undergo training about relevant legislation
- T 1.4 100 % of students in laboratory courses shall receive the relevant training for Labs

O2: The integration of sustainable development in relevant education and research shall *increase*.

- T 2.1 The proportion of courses with content of the sustainable development will increase
- T 2.2 The proportion of undergraduate theses with content of sustainable development will increase
- T 2.3 The proportion of research projects with content of sustainable development will increase

O3: The integration of sustainable development in the procurement and purchasing shall *increase*.

- T 3.1 E-books will if possible be chosen ahead of printed books.
- T 3.2 Purchasing of green, eco-labelled products will increase with x%

O4: The integration of HiG's ISO 14001 certification and work with sustainable development shall *increase*.

- T 4.1 All PR where xxx is involved will show HiG's environmental certification
- T 4.1 x% of the new program students know that high school is environmentally certified and conducts active work for sustainable development.

O5: The integration on sustainable development in HiG's collaboration with the surrounding society shall *increase*.

- T 5.1 Increase the number of cooperative engagement with the surrounding society with x%

O6: Use of materials and energy, including transportation shall *decrease*.

- T 6.1 The amount of unsorted waste shall be reduced by x%
- T 6.2 The paper consumption shall be reduced by x%
- T 6.3 Recycling of waste shall be introduced in 100% of HiG's lunchrooms.
- T 6.4 Staff transportation shall be reduced by x% to reduce the consumption of fossil fuel (emission of CO₂)
